HA, hyaluronic acid; GAIS, Global Aesthetic Improvement Scale; NASHA®, Non-Animal Stabilized Hyaluronic Acid; SB-NASHA, SKINBOOSTERS™, Non-Animal Stabilized Hyaluronic Acid.

¹15 months after initial treatment with Restylane® SKINBOOSTERS™ to boost skin quality in the hands, patients agreed (N=100). Compared with before having treatment with Restylane® SKINBOOSTERS™ VITAL. As assessed by Subject Satisfaction Questionnaire. 91.4% and 83.9% respectively. 100 patients formed the intent-to-treat patient population.¹

²As assessed by the GAIS, patients who self-reported as "somewhat", "much", or "very much" improved. Patients received bilateral facial treatment with Restylane® SKINBOOSTERS™ VITAL: one side via needle, the other via cannula, injected over three treatment sessions spaced 1 month apart.²

³12 months after initial treatment with Restylane® SKINBOOSTERS™. As evaluated by self-assessment questionnaires. Percentage of patients who agreed (somewhat agreed/agreed) (N=22) were 95.5% (HA hand gel only).³

⁴Compared with other currently available HA skin quality injectables. As assessed by published clinical studies and peer-reviewed journal publications.⁴

⁵Head-to-head data for Restylane® SKINBOOSTERS™ vs. Prohilo® is not available. Comparison is based on in situ injected HA persistence vs. duration of effect.⁵

Skin quality improvements across a wide selection of areas^{9,10}

FULL FACE

(cheeks, chin, perioral, periocular, forehead, temples)

NECK

HANDS

DÉCOLLETAGE

[†]Expert indications only

With the longest duration of skin quality improvement across available HA skin quality injectables, you can give your patients a glow that lasts for up to 15 months^{1,13}

SB-NASHA™ TECHNOLOGY MIMICS NATURAL HA^{13,14}

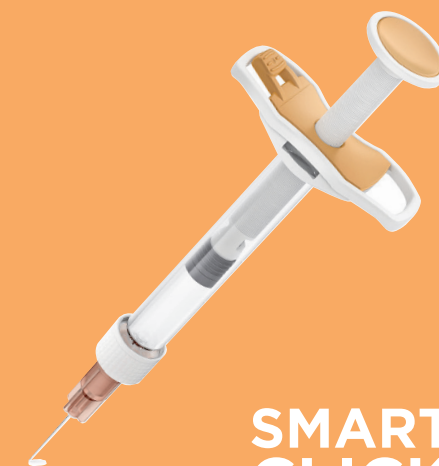

SKINBOOSTERS™ provide a unique skin quality-enhancing effect based on the high molecular weight SB-NASHA™ technology, closely mimicking natural HA.^{13,14} It revitalizes the extracellular matrix (ECM) and continuously improves the natural skin structure and quality.^{15,16}

Its unique, crosslink technology allows for continuous and lasting optimization of the environment within the ECM, boosting elastin and collagen quality for enhanced skin health¹⁶

UNIQUE SMARTCLICK™ SYRINGE

Precise microdroplet injections thanks to the award-winning bespoke SMARTCLICK™ syringe system^{11,12,17,18}

Deliver precise microdroplet injections deep into the dermis - thanks to the innovative and unique audible dosage indicator designed for consistent results and increased safety of use^{11,12,17,18}

SMARTCLICK™ SYRINGE
